

CASE STUDY

Managed Cyber Security Services for a Ministry

Benefits

- All aspects of cyber security concerns covered with a single deployment and contact
- New security perimeter established and deployed in record time
- Single security deployment reduced the number of attacks drastically resulting in zero security breaches
- Flexible, on-demand OPEX based cyber security model resulted in **savings of 45% of Total Cost of Ownership (TCO)**

Context

A local Government Ministry wanted a solution to tackle the ever-increasing number of cyber security attacks on its network infrastructure.

Challenges

- The Ministry faces an increasing number of cyber attacks each month
- Structure of departments resulted in less secure systems in subsidiary offices
- Funding for multiple cyber security deployments was not available so a comprehensive solution was required

Solution

- ODP's 24x7 Cyber Security Park services provided a single cyber security deployment
- Deployed on-demand services such as:
 - Managed Network Security
 - Web Application Firewall
 - Email Security
 - End Point Protection
 - Social Media Protection
- Oman Data Park's Security Operations Center answers support requests and provides weekly and monthly reports
